

### Introduction

FBs-CBMATH is a dedicated extension board which can be equipped on FBs PLC CPU modules to enhance the calculation ability. Working as an independent arithmetic logic, FBs-CBMATH processes request from CPU modules and return calculation result within only milliseconds, making FBs PLC capable of handling more complicated arithmetic need in a variety of applications.

### Features

Independent arithmetic logic for different time critical application

### Specifications

**Indicators:** ERR( red LED), RUN( green LED), ACT( green LED)

**Watchdog:** Yes

**PLC port speed:** 307200bps

**Power Consumption:**5V, 150mA

**Operating Temperature:**0 ~ 60 °C

**Storage Temperature:**-20 ~ 80 °C
